INFORMATION

On 12th / 11 / 97 I spoke with L. Marshall FSANI, re: his Forensic Report dated 24th October 97. As a result he listed the item marked Unknown "a" a sample of blood located on deceased Hamilton jacket & Jeans with the following DNA Profiles Paul Rodney Marc Hobson
Allister Hanway
Wayne Lunt

This examination proved negative with the unknown "a" remaining outstanding.

② On re-examining the last page of his statement L. Marshall observed that item 71 McCay Unknown b should have read unknown "a" with frequency 1:124,000 & not 1:7,500.

③ Error in Page 7. DPGI should be DREI.

| | | |
|----------------|---|--------------------------------|
| Action: Yes/No | ① Fetter corrected Page 2 to be forwarded to L. Marshall. - (Also page 7) | Action Number(s) |
| | ② Re interview with Colin Prouty & Maureen McCay to establish if (a) Colin Prouty was bleeding. | Receiver <i>[Signature]</i> |

(b) Maureen McCay can ID source of blood. (A435)

(c) Obtain necessary Buccal Swab DNA Profile to compare against outstanding "a" if possible source is established.
